

ProtecONE® T (TA 1V)

RÉGLEMENTATION ET PRÉCONISATION

Conformément à la norme française NF S 61-933 :

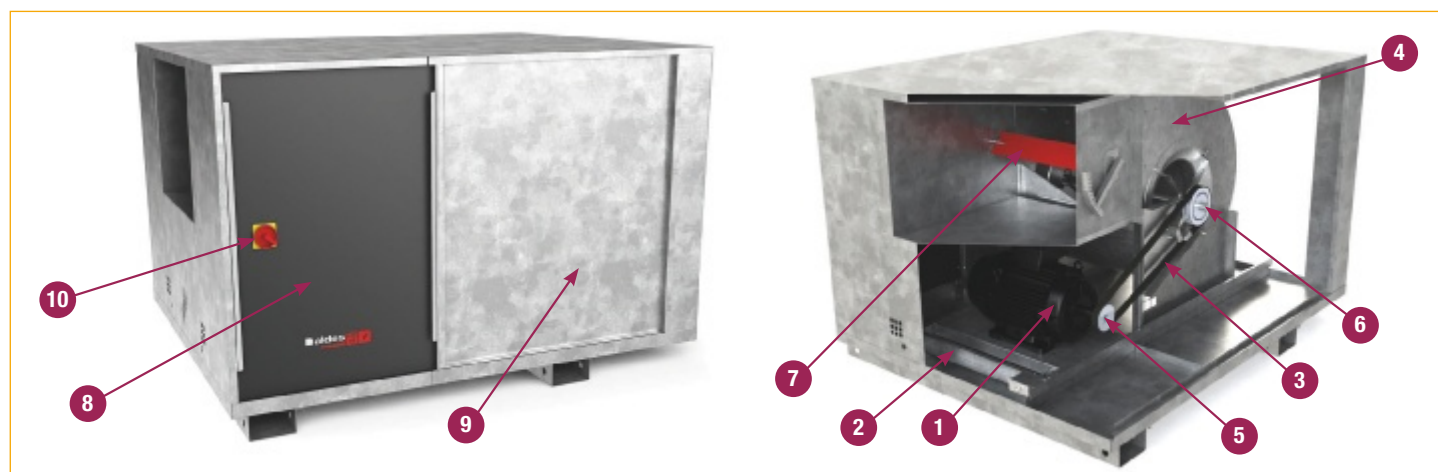

- Un examen du passage en position de sécurité des dispositifs commandés terminaux (caissons, volets, clapets) doit être réalisé tous les ans.
- L'essai des coffrets de relaiage pour ventilateurs de désenfumage doit aussi être fait tous les 3 mois.

Ces opérations doivent être réalisées par du personnel de niveau III habilité à faire de la maintenance ou de la vérification (conformément à la norme NF S 61-931)

IMPORTANT :

- Couper l'alimentation électrique avant toute intervention sur le caisson et s'assurer qu'elle ne peut pas être remise accidentellement en route pendant l'intervention.
- Tous les éléments nécessitant une intervention (roue, moteur) sont facilement accessibles.
- Dépoussiérer la roue et les organes intérieurs au minimum une fois par an.
- Ne pas utiliser de système à haute pression ou à vapeur d'eau pour le nettoyage.
- Lorsque la mise à l'arrêt du ventilateur est commandée au moyen d'une clé, vérifier annuellement que celle-ci est tenue à disposition des services d'incendie et de secours.
